

PRAKASH CHAND JAIN

Software & AI Engineer | Pune, Maharashtra, India | jainprakashchand954@gmail.com | 9340297104

[GitHub](#) | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Bharati Vidyapeeth (Deemed to be University) College of Engineering, Pune

B.Tech, Information Technology — GPA: **9.74 / 10.0**

TECHNICAL SKILLS

Languages: Python, C++, Java, TypeScript, JavaScript

AI / ML: PyTorch, scikit-learn, LLM-as-a-Judge evaluation, multi-agent system design, anomaly detection, adversarial prompt testing

Engineering: FastAPI, REST APIs, React, TypeScript, Docker, Linux, Git, LiteLLM

Data: NumPy, pandas, statistical modeling, data pipelines

PROJECTS

GAINN — Multi-Agent AI News Pipeline [Live](#)

- Designed and shipped a **multi-agent pipeline** that automates end-to-end news content generation, splitting the system into separate drafting and quality-control agent workflows to improve reliability and factual consistency.
- Productized the system as a live tool that has reached **2,000+ signups**.

StoryLens — AI Research-to-Video Pipeline [Live](#)

- Built an **end-to-end AI pipeline** that researches a topic, cross-verifies information across multiple sources, identifies key entities, and structures findings into a narrative, then automatically generates a script and animated video.
- Shipped as a live product that has reached **1,000+ signups**, demonstrating independent design of an LLM pipeline spanning retrieval, verification, and synthesis.

LLM Safety Evaluator — Automated Red-Teaming & Evaluation Platform [GitHub](#)

- Built an automated red-teaming and evaluation framework using **LLM-as-a-Judge** scoring across GPT, Claude, DeepSeek, and Gemini, implemented as a Judge-as-a-Service platform reaching **85% detection accuracy** on adversarial test prompts.
- Engineered a **FastAPI** backend with a **Streamlit** frontend and **LiteLLM** multi-provider routing; automated generation of PDF compliance reports.

Anomaly Detection in Simulated LHC Collision Data [GitHub](#)

- Designed an **Autoencoder + Isolation Forest ensemble** combining reconstruction- and density-based detection to flag anomalies across a simulated **100,000+ sample** LHC-style dataset.
- Built a **React/TypeScript dashboard** for inspecting and triaging flagged events.

EXPERIENCE

Research Intern — IDSIA / SUPSI · Supervisor: Paolo Franceschi

Dec 2025 – Jan 2026

- Researched **data collection and augmentation methods** for Imitation Learning and Vision-Language-Action (VLA) models.
- Investigated approaches to improve the **quality and diversity** of training data for robot-learning and multimodal learning-from-demonstration pipelines.

Penetration Tester — Ceeras Pvt. Ltd.

Feb 2025 – May 2025

- Conducted security assessments across internal and web systems; **automated testing workflows** that reduced manual effort by **40%**.

ACHIEVEMENTS

- Top 50 / ~250,000 participants (top 0.02%)** — ET GenAI Hackathon.
- Selected delegate, **Harvard Project for Asian and International Relations (HPAIR)**.
